PROFILE INFO

Full-Stack Software Engineer with 3+ years of experience designing and delivering scalable web and mobile applications. Specialized in AI-powered systems, LLM integration, and RAG architectures, with hands-on expertise in React.js, React Native, Next.js, Node.js, FastAPI, and end-to-end CI/CD pipelines.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java
- **Frontend :** React.js, Angular, Next.js, HTML/CSS
- **Mobile development :** React Native
- **Backend :** Node.js, Express.js, FastAPI, Spring Boot
- **Databases:** MongoDB, MySQL, PostgreSQL, Pinecone, Milvus, pgvector
- **DevOps & CI/CD:** Docker, Jenkins, GitHub Actions, GitLab CI/CD, SonarQube, Git, GitHub, GitLab
- **AI & Machine Learning:** LLM Integration, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), Scikit-learn

EXPERIENCE

Full-Stack Software Engineer

NOBLE MIND - JANUARY 2025 - NOW

- Designed and maintained scalable back-end systems using FastAPI, building RESTful APIs and data pipelines, while establishing CI/CD workflows to automate testing, builds, and deployments.
- Developed responsive, cross-platform interfaces using Next.js and React Native, delivering high-performance web and mobile applications with reusable component architectures and optimised user experiences across all devices.
- Developed AI-driven features using Generative AI and RAG across healthcare and other sectors, enhancing user interaction through intelligent analysis, virtual assistants, and personalized recommendations.

Full Stack JS/TS Developer

PARHELION - 2022-2024

- Designed and delivered full-stack web and mobile applications using Angular, React, and React Native, with a Node.js / Express microservices back-end architecture powering scalable, high-performance services ensuring consistent reliability across platforms.
- Implemented and maintained end-to-end CI/CD pipelines using Docker, Jenkins, and SonarQube, automating build, test, and deployment workflows to accelerate release cycles.

Full-Stack & Machine Learning Engineer Intern

B2M-IT - JANUARY 2024 - JULY 2024

- Designed and built full-stack web and mobile applications using Angular, React, React Native, Node.js and FastAPI.
- Led the design and development of a healthcare platform powered by machine learning for disease prediction.
- Built and trained five Machine learning models using Scikit-learn to identify various diseases with improved diagnostic accuracy.
- Integrated the models into a complete mobile and web solution tailored for both doctors and patients.
- Implemented and maintained CI/CD pipelines using Docker, Jenkins, and SonarQube, streamlining integration and deployment workflows.

Full Stack Developer -Intern

PARHELION - JUNE 2022 - SEPTEMBER 2022

- Designed and built full-stack booking web application using Angular, Node.js, Express.js and MongoDB
- Implemented and maintained CI/CD pipeline using Github Actions.

EDUCATION

Software Engineer Degree

ESPRIT
2019-2024

High School Diploma in Computer Science

Rades High school
2015-2019

PERSONAL PROJECTS

NEXTALENT - ATS RECRUITMENT PLATFORM 2026

- Designed and delivered a full-stack recruitment platform using Next.js 15, FastAPI, PostgreSQL, and pgvector
- Developed a tri-vector embedding system for CV-job matching across skills, experience, and education, combined with a hybrid scoring engine for semantic similarity and keyword alignment .

- Built a sleek, macOS-inspired UI using Tailwind CSS and Framer Motion, delivering a polished recruiter experience with smooth animations and a clean design system
- Built an interactive RAG-powered chat interface enabling recruiters to query candidate CVs in real time
- Developed a tri-vector embedding system for CV-job matching across skills, experience, and education, combined with a hybrid scoring engine for semantic similarity and keyword alignment .

AI-POWERED GITHUB ASSISTANT (MCP + LLaMA) 2025

- Built an AI-powered GitHub assistant for automated code review, bug detection, and quality improvements
- Implemented offline LLM analysis using LLaMA and Model Context Protocol (MCP) for context-aware repository understanding
- Automated issue summarization and labeling via the GitHub API

SMART HEALTH PLATFORM 2024

- Designed and delivered a full-stack digital health platform combining AI and mobile technologies for doctors and patients
- Built a cross-platform mobile app using React Native Expo with a Node.js/Express backend and MongoDB database
- Trained and deployed 5 ML models for disease prediction, with an Angular dashboard for healthcare professionals
- Established a CI/CD pipeline using GitLab and Docker for automated testing and seamless deployment

CERTIFICATIONS

- PCAP – Python Institute (official certification), React Native Developer – Meta , DevOps on AWS – AWS, Docker Foundation – Docker
- Fundamentals of AI Agents Using RAG and LangChain – IBM , Developing LLM Applications with LangChain – DataCamp
- FastAPI – DataCamp , Introduction to MCP – Anthropic

LANGUAGES

- Arabic — Native
- French — Professional Proficiency (B2)
- English — Professional Proficiency (B2)
